

Monitoring Parking Meter Maintenance

A day in the life of 32 parking meters*

[Main Page](#) > Summary

These audits represent the current state of each meter, ordered by Street Name and Meter Number. You can also view all audits in detail for a particular meter: [Show All Meters](#)

Error Data Key:
 NVR: Novram error CTJ: Coin track jam
 CSR: Coil sensor error CCE: Cashkey card error
 DBY: Dead battery LBY: Low battery
 WUJ: Wake up jam ADE: Audit data error

*An enhanced deployment of applications is planned for our existing deployments

Our sensors gather information on meter status in real time

- Know when a meter is jammed, and when it has been repaired
- Continuously get coin count information, audit and transaction information, battery levels and more
- Exception based interface lets you easily find and fix problems without waiting for manual data collection.
- Easily customized to integrate with your workflow
